

# REBUILT

## FINAL CONFERENCE

The REBUILT project is soon coming to an end, and we have mixed emotions about it! While we are saddened by its conclusion, we are also filled with joy as we reflect on the success of our final conference, where we showcased the achievements and outcomes of the project. The day was truly remarkable, brimming with insights, inspiration, and a shared dedication to constructing a sustainable future. It served as a platform for collaboration, uniting passionate individuals committed to the cause. From discussions on the urgency of addressing the climate crisis to deep dives into risk assessments and firsthand accounts from businesses that have embraced green practices, each session propelled us closer to positive change. The introduction of the REBUILT Online Campus marked a significant milestone in enhancing education accessibility. Presentations on best practices, low-carbon transitions, and practical recommendations underscored our collective determination to effect actionable change. As the conference drew to a close, we took a moment to reflect on the wealth of knowledge acquired and the relationships forged, paving the way for a continued journey towards a resilient and sustainable tomorrow.

## FINAL PROJECT MANAGEMENT MEETING IN ATHENS, GREECE

We're thrilled to share the latest developments from our final meeting in Athens, Greece, which took place on February 7th 2024, where the Erasmus+ REBUILT project reached its concluding stages. Together, we discussed the remaining steps and outlined our to-do list as we approach the project's conclusion. With enthusiastic participation and collaborative spirit, we are poised to successfully wrap up the project, achieving our goals and paving the way for future endeavors. Stay tuned for more updates as we embark on this exciting journey towards completion!

### REBUILT Course Will Remain Available on MOOC Platform!

As we approach the conclusion of our project, we invite you to continue being a part of the REBUILT story. We're delighted to announce that the "REBUILT: Reengineering Business Under Climate Changes" course remains accessible on the MOOC platform. This means that entrepreneurs, students, and anyone interested in sustainable business practices can still enroll in this innovative course to gain valuable insights and skills for navigating business challenges in a changing climate. Feel free to enroll now at <https://learning.rebuilt-project.eu/>.
